DECO7381 – Individual Project

STATEMENT OF DELIVERY

The individual feature I created is a contract creation system to assist users with creating a contract.

USING THE CREATE CONTRACT FEATURE

Borrowers will be able to access the create contract form from the MyTransactions page. When they have a contract which is fully financed a link will appear taking them to the one page contract form, which then leads to a preview of the contract. From the preview page the user can go back and make changes to the form or they can finalise the contract. Once the contract is finalised, they have the option of printing the contract out.

Going back to the MyTransactions and clicking on the contract link again will send the user straight to the preview page and they will be unable to make further changes.

APPENDIXES

THE RELEVANT FILES[1]

Five files were created for this feature:

- app/models/Contract.php
- app/controllers/ContractController.php
- app/views/createContract.blade.php
- app/views/previewContract.blade.php
- app/foundation-5.4.0/css/css_contract.css

There is also additional code for this feature in the following files:

- app/views/mytransaction.blade.php
- app/routes.php[2]

The following were also imported specifically for elements within the create contract feature.

- app/foundation-5.4.0/jquery_ui.js
- app/foundation-5.4.0/css/jqueryui-css.css

---

[1] All relevant files have been contained within the submission zip file, but the files are all live on the site and can be accessed by going to http://deco3801-05.uqcloud.net/ and logging in.

[2] My section in this file is commented as such. Search for "contract".

PARTIAL DATABASE SCHEME

USERS ALREADY SET UP FOR TESTING [3]

To access these users and test the features go to http://deco3801-05.uqcloud.net/ and log in. Please note that the statuses of the contracts may change if other testers use them. Please feel free to create new loans and play with the system.

Email	Password	Contract Status
deanwinchester@mailinator.com	impala	
castiel@mailinator.com	dean	
perfectscore@mailinator.com	password	• Draft • Null

---

[3] At the time of submission the borrowing feature wasn't operational (other group members were editing for their features) but the majority of fields for Dean and Castiel are prefilled so setting up a new loan with either of them will be very quick and easy.
